## REVIEW COMMENT SHEET

Return comments to	Carol Blicher	080	9100	8663	Comment Due Date	August 31, 1995
	Name	Bldg	Phone	fax		
Document	RE/ER 95-0098	0	Draft	OU5 RE/RI Report (Woman Creek Priority Drainage)		
	Number	Rev	Draft or Final	Title		

General (G) comments require resolution but do not require resolution acceptance. Mandatory (M) comments require resolution and resolution acceptance. 1 A03-PPG-004 provides complete definitions of General and Mandatory comments.

TYPE G or M	PAGE	SECTION or LINE #	COMMENT	DISPOSITION	Disposition accepted initial & date
G	Cover		Document cover/title does not include KH	The approved cover sheet will be used. It includes Kaiser Hill and RIMRS logos.	<i>JMB</i> 10/14/95
G	list of acronyms		Suggest deleting reference to AFARs	Disagree. It is mentioned in Section 8.0	<i>JMB</i> 10/14/95
G	ES		Include the ERA results in the executive summary. There was not a place holder for it in the ES.	Agree. The ERA results have been included in the Executive Summary.	<i>JMB</i> 10/14/95
G		8	Suggest deleting Section 8.0 Preliminary Evaluation of Remedial Alternatives since the summary/recommendation is that no action is warranted.	The Preliminary Evaluation of Remedial Action Objectives is required by the OU5 Work Plan. The text in this section only states that the process will be done if further action was warranted.	<i>JMB</i> 10/14/95

G			<p>Based on a future land use that does not include residential use and recommendation is for no action</p> <p>Anticipate comments from CDPHE that to get a no action decision would need to be able to free release the site which would mean site could be used for residential use (To ensure that residential use is not going to occur DOE would need an institutional control in place An institutional control is an Action.)</p>	Agree Comment noted	<p>gmb 10/14/15</p>
G			<p>Expect comments from EPA and the CDPHE that groundwater was not considered in the risk assessment Will need to be able to convince the regulators that groundwater and the groundwater/surface water interface are being addressed in the sitewide groundwater management strategy</p>	<p>Groundwater was considered in the risk assessment Results of the modeling and sampling shows that ground water COCs and surface water COCs are not the same (after screening) and it appears that ground water does not contribute to surface water COCs Contaminant monitoring well selection being completed by the Well Evaluation Project is targeting drainages as areas of continued monitoring</p>	<p>gmb 10/14/15</p>

M			Dose assessments as opposed to risk estimates must be performed for radionuclides in order to satisfy the requirements within DOE Order 5400.5 Radiation Protection of the Public and the Environment to show that doses do not exceed the 100 millirem annual dose limit set forth in the DOE Order. This analysis was not performed in this risk assessment and should be completed and included in the draft final document.	This analysis has been performed and included in the draft final document.	MJH 10/14/95
G			A technical edit is needed.	A final technical edit has been done.	MJH 10/14/95
